WE KNOW WHAT PERMANENT MEANS!
Use the POR-15® 3-Step System to Stop Rust Permanently!

POR-15® products are designed to work as a complete system. When used together, they provide a coating that not only stops rust, but prevents it from returning. POR-15® products are available individually, and many are available in money saving kits geared to your specific restoration need. Here is how the POR-15® 3-Step system works:

**STEP 1 - Clean & Degrease Surface**
Clean metal surfaces with water-based POR-15® Cleaner Degreaser. It removes dirt, grease, wax and other contaminants that interfere with restoration. See page 4 for more information.

**STEP 2 - Neutralize Rust; Etch Metal**
Use POR-15® Metal Prep on the surface to remove rust or prepare it for POR-15® Rust Preventive Coating. Metal Prep neutralizes rust, etches metal, and coats it with zinc phosphate for better adhesion. See page 5 for more information.

**STEP 3 - Apply Rust Preventive Coating to Surface**
Apply 2 thin coats of POR-15® Rust Preventive Coating. You’ll get an unbelievably tough, hard finish that won’t crack, chip, or peel. It’s so tough you can pound it with a hammer and not damage it! That’s REAL protection! See page 6-7 for more information.

Then Topcoat the Surface
Finish your job with a POR-15® Top Coat or any other POR-15® coating that suits your needs.

POR-15® high performance coatings revolutionized rust protection. These state of the art products form an impenetrable barrier that protects a variety of surfaces from water, chemicals, salt, UV rays, corrosive contaminants, and every day wear and tear. POR-15® products have been applied to thousands of vehicles around the world from celebrated restoration shops to antique car museums and classic car shows.

P.O.R. Products, the makers of POR-15®, is a family-owned company headquartered in New Rochelle, New York complete with our own team of chemists and a state-of-the-art manufacturing facility on-site. For nearly a century, we have been committed to innovation and quality control with an emphasis on personal and professional customer service. P.O.R. Products continues to evolve through research and development to grow our achievements in the industry.

**Cleaner Degreaser**

**Cleans and Degreases in One Application**

POR-15® Cleaner Degreaser cleans and degreases in one application without leaving residues, noxious fumes or flammable solvents. No other cleaner works as fast or as well. It makes petroleum-based cleaners almost obsolete because it can be diluted with water to 4, 5, and even 10 times its volume while remaining even more potent than other cleaners. POR-15® Cleaner Degreaser removes grease, oil, mildew, algae, musty odors, soap films and wax. Use it to clean canvas, vinyl, nylon, holding tanks, grease traps, auto parts and more. Before applying ANY rust preventive coating or paint, you MUST remove all oily film or residue to be absolutely certain of good adhesion.

**APPLICATIONS:**
- Engines
- Suspension Components
- Transmissions
- Grease Traps
- Floor Pans

**APPLICATIONS:**
- Fuel Tanks
- Frames
- Rubber, Nylon, Vinyl
- Water Line Scum

We used the POR-15® Cleaner Degreaser to remove any surface oils or other contaminants on the metal. After primer, the correct semi-gloss black paint from POR-15® was applied with a spray gun and compressor on all parts of the frame.

– Rod and Custom Magazine.

**Metal Prep**

**Etches Metal and Leaves a Zinc Phosphate Coating**

Now that you’ve degreased and cleaned your metal, use POR-15® Metal Prep to guarantee the best paint adhesion on ANY metal surface, including aluminum and shiny polished metal surfaces. POR-15® Metal Prep etches metal, leaves a zinc phosphate coating, and creates the perfect anchor pattern for any topcoat, especially our incredible POR-15® Rust Preventive Coating.

**FEATURES:**
- Easy-to-Use, One-Step Process Coats Metal with Zinc Phosphate
- No Harmful Residues
- Presents Perfect Paint Adhesion
- Reusable
- Provides Perfect Base for All Paints
- Removes Surface Rust in Minutes!
- Gives Better Welding Conductivity

…we located the rustiest car we could find and performed a complete floor pan replacement. The key to the repairs is etching the new metal with Metal Prep and sealing it with POR-15® and paint… This ensures rust will not be a problem in the future.

POR-15® Rust Preventive Coating

No Need to Remove Rust First!
The secret lies in POR-15® Rust Preventive Coating’s curing process. Most paints dry through evaporation, but POR-15® Rust Preventive Coating dries faster when moisture is present. It has the opposite chemistry of ordinary paints. Now add to that POR-15® Rust Preventive Coating’s incredible hardness, toughness, and flexibility, and you have a coating that is practically indestructible. POR-15® is great for auto restoration and this incredible product is now sold in 52 countries around the world.

Use POR-15® to protect expensive and valuable equipment against rust and abrasion. POR-15® also has excellent “surface tolerance,” which means it works very well on porous surfaces.

FEATURES:
- 1 Qt. covers 96 sq. ft. / 1 liter covers 9.2 M2
- Double the solid content of most paints
- Compatible with all paint systems
- Tested to over 450°F / 232°C
- Exceeds 2000 hours salt spray test
- Dries faster in humid conditions
- Self-leveling
- Hammer tough
- Single Component
- Repels all fuels and oils
- Resistant to most acids and alkalis

The secret lies in POR-15® Rust Preventive Coating’s curing process. Most paints dry through evaporation, but POR-15® Rust Preventive Coating dries faster when moisture is present. Now add to that POR-15® Rust Preventive Coating’s incredible hardness, toughness, and flexibility, and you have a coating that is practically indestructible. POR-15® is great for auto restoration and this incredible product is now sold in 52 countries around the world.

Use POR-15® to protect expensive and valuable equipment against rust and abrasion. POR-15® also has excellent “surface tolerance,” which means it works very well on porous surfaces.

Applications:
- Automotive – chassis, doors, floors, trunk areas, suspension, engines & fuel tanks
- Industrial – heavy equipment, truck components, trailers, fuel storage, rebar, steel forms, concrete, storm grates, transformers
- Marine – decks, bilges, hulls, pipes, chain lockers, masts
- Also excellent for sealing and repairing fiberglass

POR-15® Dry Time Accelerator
Additive for POR-15® Rust Preventive Coating
POR-15® Dry Time Accelerator is an additive specially formulated to accelerate the cure time of POR-15® Rust Preventive Coating by 30-50% without affecting the ultimate physical properties. Developed to allow for a more efficient production environment, Dry Time Accelerator reduces recoat and dry time and enables you to move on to the next phase faster, without compromising product performance.

The accelerator is added to POR-15® Rust Preventive Coating by volume and should be thoroughly mixed. Once mixed, the cure time is reduced by 30-50%. One 8 oz. bottle is enough for 32 quarts or 8 gallons of POR-15® Rust Preventive Coating.

POR-15® High Build Primer

**Weld-Thru Primer**

**Weldable Zinc Enriched Primer**

POR-15® Weld-Thru Primer can be applied over cured POR-15® Rust Preventive Coating and all POR-15® topcoats to enable quick refinishing and recoating of these products. POR-15® Weld-Thru Primer also adheres well to steel, aluminum, stainless steel, brass, and other primed and painted surfaces.

**Self Etch Primer**

POR-15® Self Etch Primer is the perfect solution for painting over top of cured POR-15® Rust Preventive Coating. This terrific, high-tech coating will gently etch cured POR-15® Rust Preventive Coating, making the perfect surface for bonding with the paint of your choice. Now you can use POR-15® Rust Preventive Coating for the ultimate protective coating, while also finishing with any of our single or two part topcoating paint!

You’ll love the way it bonds to cured POR-15® Rust Preventive Coating, and the way other paints bond to it.

Note that very old, cured POR-15® Rust Preventive Coating finishes may still require light attention with some coarse sandpaper.

**Detail Paint**

Replicate the look of metals on original cast parts.

POR-15® Detail Paint provides professional grade finishes that reproduce the original look of cast parts. POR-15® Detail Paint is perfect for water pumps, intake manifolds, and master cylinders. Designed to protect against rust, all the colors are developed to have a low sheen, and will not yellow to keep your restored component looking factory new.

POR-15® Detail Paint is formulated to provide maximum corrosion resistance and protect metal substrates against weather, sunlight, oil, and water.

**Buildable & Sandable**

For years we’ve worked on a primer to paint over well-cured POR-15® Rust Preventive Coating. We wanted one that was buildable and sandable and easy to apply. POR-15® High Build Primer is the answer. It has great interlocking adhesion qualities and very little preparation is necessary to get a top-notch bond. With a solids content of 60%, High Build Primer has all the body it needs to do the job right with great leveling as well as to overcome surface irregularities.

POR-15® Top Coat is a direct-to-metal coating designed to work incredibly well in all applications where there is a need to preserve substrates susceptible to corrosion. Under exposure to sunlight and weather POR-15® Top Coat has exceptional long-term gloss and color retention. POR-15® Top Coat can be applied directly to metal substrates, with no need for a primer or undercoat, and is formulated to form a robust barrier that sheds moisture to provide long lasting protection. POR-15® Top Coat has excellent adhesion and when used over POR-15® Rust Preventive Coating the products create a system works to provide a permanent barrier to corrosion.

- **Direct to Metal (DTM) Rust Preventive Paint**
- **No Need for Primer or Undercoat**
- **Use over POR-15® Rust Preventive Coating for Permanent Protection**

**Engine Enamel**

Restore, brighten or customize your engine with POR-15® Engine Enamel. This durable direct to metal coating creates a smooth, high-gloss finish that withstands the rigors of the engine compartment while improving the look and preventing corrosion of the metal components. POR-15® Engine Enamel withstands temperatures up to 300°F (148.8°C). In addition to its exceptional long-term gloss and color retention it resists damage from oil, gas, grease, salt, humidity, solvents and of course rust.

POR-15® Engine Enamel is formulated to match O.E.M. standards and to keep engine surfaces from pitting and rusting and deliver the look and performance expected from POR-15®.

**2K Urethane**

Check out our new super-tough POR-15® 2K Urethane paint. 2K Urethane paint is a tough, glossy, two-component coating for use over primed or painted surfaces. When fully cured, 2K Urethane paint is rock-hard, chemical-resistant, and incredibly tough. Durable and easily cleaned, it will not crack, chip, or peel with age. This beautiful, two-component coating is stronger than any color paint you have ever tried. The long-lasting brilliant colors will look terrific wherever you use them, and remain durable.

POR-15® Rubberized Under Coating is a flexible, paintable, black coating. It will protect against moisture, dust, heat and cold. It is an excellent moisture barrier and creates an effective sound barrier that reduces vibration and deadens sound in wheel wells, quarter panels, fenders, frames and under carriages. Provides superior adhesion to both painted and unpainted surfaces. POR-15® Rubberized Under Coating has superior resistance to road salt and will resist chipping and abrasions.

Rubberized Under Coating | Spray 22 oz. | 49308

POR-15® OEM Bed Liner is formulated to protect surfaces that are exposed to impact and scuff related environments while out performing non water-based formulas. POR-15® OEM Bed Liner is a low-odor, water-based, soap and water cleanup, rubberized coating that offers superior adhesion, impact resistance, and flexibility, as well as an attractive, non-slip texturized gloss black finish. POR-15® OEM Bed Liner is UV stable and will resist damage typically caused by exposure to UV. For the ultimate in protection apply over POR-15® Rust Preventive Coating.

POR-15® OEM Bed Liner Prevents Moisture

**RECOMMENDED USES:**
- Metal truck beds
- Rocker panels
- Trailers
- Tractor beds
- Running boards
- Work van floors

POR-15® Matte Clear Coat seals in any color or patina for a custom low sheen look with amazing results. POR-15® Matte Clear Coat is specifically designed to deliver an extreme level of resistance to scuffing and scratching, and be a leader in waterborne and even traditional matte clear coatings. POR-15® Matte Clear Coat is formulated with a low VOC, Waterborne Polyurethane Clear Coat Technology that is silica free. POR-15® Matte Clear Coat has excellent weathering properties and can be used on any substrate that can be cleared with a traditional clear coat.

**Note:** Exact colors may vary, due to the printing process.

### Fill It!

**Patch**

Filler and Seam Sealer

For years our customers have asked us for a thicker version of our world-famous POR-15® Rust Preventive Coating, to use for filling seams or holes. Here it is! POR-15® Patch is, quite literally, POR-15® Rust Preventive Coating in a tube, and like POR-15® Rust Preventive Coating, it dries as hard as a rock, remains flexible, and once dry is totally impervious to fuels and solvents. It’s so tough it may actually add strength to weakened metal. And it won’t absorb moisture and swell like conventional body fillers.

### Epoxy Putty

**Industrial Pliable Filler**

This incredible epoxy putty product is so strong you can drill and tap it, yet malleable enough that you can apply it with your fingers. Since it is water-based, you can simply wet your fingers, and work it until it is almost perfectly smooth before it dries – eliminating most sanding! But when it cures, it’s rock hard, making it perfect for repairing steel, plastics, concrete, etc. Amazingly, it even sticks to damp surfaces, and will cure under water.

**FEATURES:**
- Malleable consistency, fill in anywhere
- Hardens like steel
- Mixes like clay & Cures in water
- No measuring or weighing
- Stays in place, doesn’t slump or sag
- Can be sanded, drilled, machined, sawed & painted

### Use It To:
- Permanently seal seams
- Patch holes in steel, wood, or plastic
- Fix holes in fuel tanks
- Bond steel to plastic, wood, or concrete
- Repair concrete and cinder blocks

Stop Rust Kit

A super starter kit complete with our 3-Step System!

This kit contains everything you need to use our 3-step rust-stopping system. The POR-15® 3-Step System is designed to stop and/or prevent rust on metal surfaces and ensures the best results when applying POR-15® Rust Preventive Coating. The clear-cut process allows for the proper cleaning, prepping, and coating of metal to create a non-porous surface that seals and protects from water, chemicals, and salt, and other corrosive contaminants.

KIT CONTAINS:
- 8 oz bottle POR-15 Cleaner Degreaser
- 8 oz bottle POR-15 Metal Prep
- 4 oz can POR-15 Rust Preventive Coating
- Paint Brushes, Latex Gloves
- Detailed Instructions

FEATURES:
- Covers a 6 sq. ft. area with two coats
- Ideal for small projects such as small subframes, axle replacements, control arms, brake shields, and more
- Results in a hammer-tough finish resistant to most acids and alkalis, and repels all fuels and oils

Floor Pan & Trunk Restoration Kit

You’ll save hundreds of dollars over replacement... and your restoration will be better than replacement because you’ll never see rust again, whether it’s a daily driver or a show car. You can maintain the integrity of the structure with no ugly welded seams. Our easy step-by-step instructions make it simple to restore floor pans, trunk pans, pickup truck beds, etc. You’ll be amazed how complete it is... Everything you need is at your fingertips! Order your kit today!

KIT CONTAINS:
- 1 Qt Cleaner Degreaser
- 8 oz Metal Prep
- 8 oz Solvent
- PowerMesh Reinforcing Fabric
- 2 Pts POR-15® Rust Preventive Coating (silver & black)
- 1 Qt Top Coat Chassis Black
- Safety Face Mask
- Dispensing Scoop
- Epoxy Putty
- All Four Brushes Needed
- Latex Gloves

Rick Dale and the crew at Rick’s Restoration in Las Vegas, Nevada use POR-15® products on many of their projects and POR-15® has been seen on the History Channel’s series American Restoration.
Fuel Tank Sealer

POR-15® Fuel Tank Sealer was formulated and developed in our own laboratories due to the demand for a high-tech sealer impervious to all fuels, including the new Stage II fuels which have a higher alcohol content. It has superior strength and fuel resistance, and does not contain Methyl Ethyl Ketone, a highly flammable and deadly carcinogen (cancer-causing).

FEATURES:
- Resistant to all fuels, alcohol, additives and solvents
- Stops rust, corrosion & leaks
- Seals pinholes & seams
- Permanently flexible

Chemically bonds to metal surfaces (even rusted)
- Light gray color for easier viewing inside the tank
- Available in quarts (capable of sealing a 25 gal. tank)

Step-by-Step Fuel Tank Repair

Before: This fuel tank had small pin hole leaks on the end near the seam.

Step 1: Mix 1 quart Cleaner Degreaser with one quart of hot water. Use this solution to remove any gum, varnish or sludge from the inside of the tank.

Step 2: Pour in the entire bottle of Metal Prep to dissolve rust, coat the tank with zinc phosphate, and etch the metal for better adhesion of the sealer.

Step 3: After the tank is clean, drain the tank and rinse thoroughly with water. Let the tank dry.

When totally dry, pour in the can of Fuel Tank Sealer.

Step 4: After all surfaces have been coated, drain the tank for about an hour to remove excess sealer from the tank.

Step 5: Once repaired, use a fuel preservative & stabilizer to keep your entire fuel system in proper working order and to avoid “ stale gas” problems in your future!

Motorcycle Fuel Tank Repair Kit

Motorcycle Fuel Tank Repair Kit has been designed for the special needs of bikes and other small metal fuel tanks such as recreation vehicles, snowmobiles, outboard motors, generators, etc.

MOTORCYCLE FUEL TANK KITS CONTAIN:
- All items included in our standard auto Fuel Tank Repair Kit
- Brush for applying patching system to exterior of tank
- Fabric for sealing holes or reinforcing weak areas
- Proven to effectively seal fiberglass tanks
- Safe for use with Ethanol fuel

Fuel Tank Repair Kit

Fuel Tank Repair is more than just pouring in a quart of sealer and sloshing it around. If gum, varnish, sludge, or fuel is inside the tank, it must be removed first. Our POR-15® Fuel Tank Sealer, like other sealers, will not work in a contaminated tank. Find out what the pros already know… get our Fuel Tank Repair Kit with everything you need to do the job right.

KIT CONTAINS:
- Cleaner Degreaser to remove gum and varnish from tank
- Metal Prep to remove rust and prepare tank for sealer
- Fuel Tank Sealer to permanently seal tank
- Detailed instructions
**Rust Dissolving Solution**

POR-15® Rust Remover will safely remove light to even heavy rust completely from metal surfaces and will not affect plastic, PVC, or most paints. One gallon derusts up to 300 pounds of heavily rusted steel. Rust Remover will not harm unrusted steel and is safe on other metals. Rust Remover has no fumes or bad odors and no VOCs. No sanding or scrubbing required. POR-15® Rust Remover works in as little as 20 minutes for light rust or overnight for heavy rusted metal.

**FEATURES:**
- Environmentally safe
- Water-based
- Safe on delicate metal parts
- No Sanding or scrubbing required
- No VOCs
- Noncorrosive
- Odorless
- Reusable
- Will not harm non-rusted surfaces

**KIT CONTAINS:**
- 1 Qt Cleaner Degreaser
- 4 oz POR-15® Rust Preventive Paint
- 8 oz Metal Prep
- 8 oz Caliper Paint
- 2 Pair Gloves & 2 Foam Brushes
- 1 Roll Masking Tape
- Directions to do the job right
- Also available in individual 8 oz. cans

**PRODUCT SIZE CODE**
- Rust Remover Gal. 40701
- Rust Remover Qt. 40704

In a side by side test with the best brands out there, POR-15® Rust Remover performed just like we designed it. It dissolves rust while not harming the non-rusted surface and it works quickly. See our product test video at [www.POR15RustRemover.com](http://www.POR15RustRemover.com).

**Caliper Painting Kit**

**Dress Up Your Calipers!**

Nothing ruins the appearance of a sharp set of wheels like dirty, corroded calipers lurking from behind. Now, dress up those steel or aluminum calipers with a super-tough durable finish.

Our new caliper paint is beautiful in appearance, and strong enough to withstand the punishment of road debris and temperature extremes. And it looks terrific on any car or truck. Then, whenever your calipers get covered with dirt and brake dust, clean them with anything you like; the POR-15® Caliper Paint will stand up to just about anything.

**KIT CONTAINS:**
- 1 Qt Cleaner Degreaser
- 4 oz POR-15® Rust Preventive Paint
- 8 oz Metal Prep
- 8 oz Caliper Paint
- 2 Pair Gloves & 2 Foam Brushes
- 1 Roll Masking Tape
- Directions to do the job right
- Also available in individual 8 oz. cans

**FEATURES:**
- Environmentally safe
- Water-based
- Safe on delicate metal parts
- No Sanding or scrubbing required
- No VOCs
- Noncorrosive
- Odorless
- Reusable
- Will not harm non-rusted surfaces

**PowerMesh**

*Reinforcing Fabric*

While most fabrics tend to bunch or bulge, **PowerMesh** lays flat, nicely, while you coat it with **Rust Preventive Coating**. It is perfect for repairing holes in steel, fiberglass, wood, or even many plastics.

**Accessories**

**Boss Gloss**

*Clean & Protect Plastic, Rubber & Vinyl*

Treat and preserve plastic, rubber, and vinyl with **Boss Gloss**. We decided to make our own premium quality product, in the style and tradition of all other **POR-15®** Products, with more solids, and NO alcohol or solvents which can remove vital plasticizers, and lower the life expectancy from vinyl and rubber.

**Solvent**

**POR-15® Solvent** is the only appropriate solvent to use when thinning our coatings for spray painting. We developed it precisely for this purpose, at the request of many of our loyal customers.

**POR-15®**
**POR-15® Concrete Floor Coatings**

POR-15® has an extensive line of Concrete Floor Coating products ranging from primer/sealer to clear coats and everything in between. With the fan favorite super convenient kits, plus new selections to include low VOC water-based products, the POR-15 concrete floor coatings family of products has it all. These premium high performance products create concrete floor coating systems resulting in floors that are chemically resistant, protected against heavy use, and have a long-life span minimizing the need for repairs. POR-15 Concrete Floor Coatings will brighten concrete floors and deliver a professional look and finish with the POR-15 quality control that is second to none in the industry.

**Concrete Floor Armor LV**

2-Part High Solids Epoxy Floor Coating

POR-15® Concrete Floor Armor® LV is a water-based, 2-component high solids epoxy concrete floor coating. It is formulated to provide excellent chemical, abrasion, and impact resistance for use on commercial and light industrial concrete floors. For best results apply POR-15® Concrete Floor Armor® LV over POR-15® Concrete Primer Sealer. POR-15® Concrete Floor Armor® LV provides a durable, easy-to-clean, chemical resistant coating.

---

**Concrete Primer Sealer**

2-Part High Solids Epoxy Coating

POR-15® Concrete Primer Sealer is a water-based, 2-component high solids epoxy coating that has been developed to function as a primer sealer on properly prepped concrete surfaces and also acts as a foundation for POR-15® Concrete Floor Armor systems. POR-15® Concrete Primer Sealer offers durability to any floor coating project with the convenience of a low VOC water-based formula. It brings the adhesion performance of POR-15® Concrete Floor Armor Systems to the next level.

---

**Concrete Clear Coat LV**

2-Part Waterborne Urethane Floor Coating

POR-15® Concrete Clear Coat LV is a 2-component waterborne urethane coating. This coating produces an extremely durable, chemical-resistant surface with the benefits of soap and water cleanup. POR-15® Concrete Clear Coat LV provides excellent gloss and color retention when used on exterior surfaces exposed to sunlight and rain and its chemically crosslinked formulation creates a coating that is chemically resistant and tough, so it resists scratches and abrasion. For best results apply POR-15® Concrete Clear Coat LV over POR-15® Concrete Floor Armor® LV.

Concrete Floor Armor LV Kits

The POR-15 Concrete Floor Armor® LV Basic Kit contains: 3 gallons Concrete Floor Armor® LV, Hardener/Activator, Non-Slip Aggregate, 16 oz. Grease and Oil Remover, one ¼" Nap Roller Cover, one ½" Nap Roller Cover, one 9" Roller Frame, two Chip Brushes, Stir Stick, and Rubber Gloves.

LV BASIC KITS: Dark Gray #48019 or Light Gray #48119

The POR-15 Concrete Floor Armor® LV Deluxe Kit contains: 3 gallons Concrete Floor Armor® LV, Hardener/Activator, Non-Slip Aggregate, 16 oz. Grease and Oil Remover, two ¼" Nap Roller Covers, one ½" Nap Roller Cover, two 9" Roller Frames, three Chip Brushes, Stir Stick, and Rubber Gloves, plus 2 gallons POR-15® Concrete Clear Coat LV and Decorative Chips.

LV DELUXE KITS: Dark Gray #48069 or Light Gray #48169

Concrete Floor Armor Kits

The POR-15 Concrete Floor Armor® Basic Kit contains: 3 gallons Concrete Floor Armor®, Hardener/Activator, Non-Slip Aggregate, 16 oz. Grease and Oil Remover, one ¼" Nap Roller Cover, one ½" Nap Roller Cover, one 9" Roller Frame, two Chip Brushes, Stir Stick, and Rubber Gloves.

BASIC KITS: Dark Gray #47319 or Light Gray #47419

The POR-15 Concrete Floor Armor® Deluxe Kit contains: 3 gallons Concrete Floor Armor®, Hardener/Activator, Non-Slip Aggregate, 16 oz. Grease and Oil Remover, two ¼" Nap Roller Covers, one ½" Nap Roller Cover, two 9" Roller Frames, three Chip Brushes, Stir Stick, and Rubber Gloves, plus 2 gallons POR-15® Concrete Clear Coat LV and Decorative Chips.

DELUXE KITS: Dark Gray #47369 or Light Gray #47489

Concrete Clear Coat

2-Part Aliphatic Urethane Floor Coating

POR-15® Concrete Clear Coat is a gloss 2 component Urethane. It is designed to be applied over POR-15® Concrete Primer Sealer resulting in an incredibly robust floor coating. This product provides excellent gloss and color retention when used on exterior surfaces exposed to sunlight and rain. POR-15® Concrete Clear Coat aliphatic urethane floor coating is recommended as the final layer, to be applied over POR-15® Concrete Floor Armor®, in a multi-layer system. The highly cross-linked formula provides superior abrasion, chemical, and solvent resistance for high use interior surfaces.

STEP 1  
Clean it!

STEP 2  
Prep it!

STEP 3  
Coat it!

Then Top Coat it!

NEW PACKAGING  
Cleaner Degreaser (Step 1)  
New container, same great product!  
See page 4 for product details.

NEW PACKAGING  
Metal Prep (Step 2)  
New container, same great product!  
See page 5 for product details.

Available in multiple colors in liquid and aerosol formulas.
